PROCEDURE in appeal in regard of didactic products' Validation

Municipality does not agree with a non validation decision taken by the group of ES experts

Municipality must justify, during a transnational seminar in presence of all partners, why they appeal against the non-validation decision

The ES partner will choose an "expert in call" who has never evaluated it by the past and will test the disputed product

One removes the lowest note (first expertise) which one replaces by the new (expert in call)

New note, new average

The final decision is taken as a last resort
