

FEFI Project

French Experimentation

Following female inmates' requests through Q1

- 1 - They would like to have more teaching*
- 2 - They found that the proposed frames do not enough focus on professional areas*
- 3 - They would like to be eligible for additional professional training with the possibility to get certified.*

Two proposals to experiment

- 1 - The implementation of vocational training to get certified in a “short sentences” prison*
- 2 - The start of prior learning’ valorization in another prison*

About 1st Experimentation

- 1 – Try to complete a training session already running in a « short sentences » prison
- 2 – Try to initiate a training session with an ending validation in another prison

...Finally... about 1st experimentation

We could be able to open in a 3rd prison one training session referring to « Economy and Sales techniques.»

About 2nd experimentation

During April 2015 we have been able to implement at the prison of Limoges (with one wing for female inmates) what we call the « 4th way to pass exams ». Its name is VAE (skills' validation of prior experiential learning).

About 2nd experimentation

Two first results

- 1 – Develop a service where it does not exist yet
- 2 – Make sure that something started by a female inmate inside the prison can still go on after she's released (*inside/outside link*).

Where are we now ?

Inside the prison

- 1- we had 3 candidates but only one met the rules
- 2 – teachers in prison and VAE counselors helped this candidate to fulfil its 1st booklet (administrative part) while she still was in prison.

Outside the prison

- 1- we have contact with the ex-female inmate where she now lives
- 2 – we have to organize the service with the VAE Department in the area of Bordeaux (*remember, she was sentenced in Limoges*)
