Countries represented in the study	International
Summary of study/report	<p>The radicalization leading to violence has become a growing international concern, particularly in the case of developed countries.</p> <p>This rapport has four parts. The first part shows global trends in radicalization; The second part is an overview of the explanatory factors and models of radicalization, as well as the recruitment contexts; The third focuses on the different models of intervention and prevention of radicalization and the fourth concludes this report, in addition to formulating certain recommendations.</p>
Key findings	radicalization - violence
Conclusions of review
