

# Assessment and Validation system in informal and non-formal contexts

Enrica Pautasso, Blinc eG

VALMOPRIS Project – Kick-off meeting

Glasgow Oct. 2015

Yes, we learn also outside school....

# But what is a competence?

It is more  
than a sum  
of data...

## 2. What is a competence?

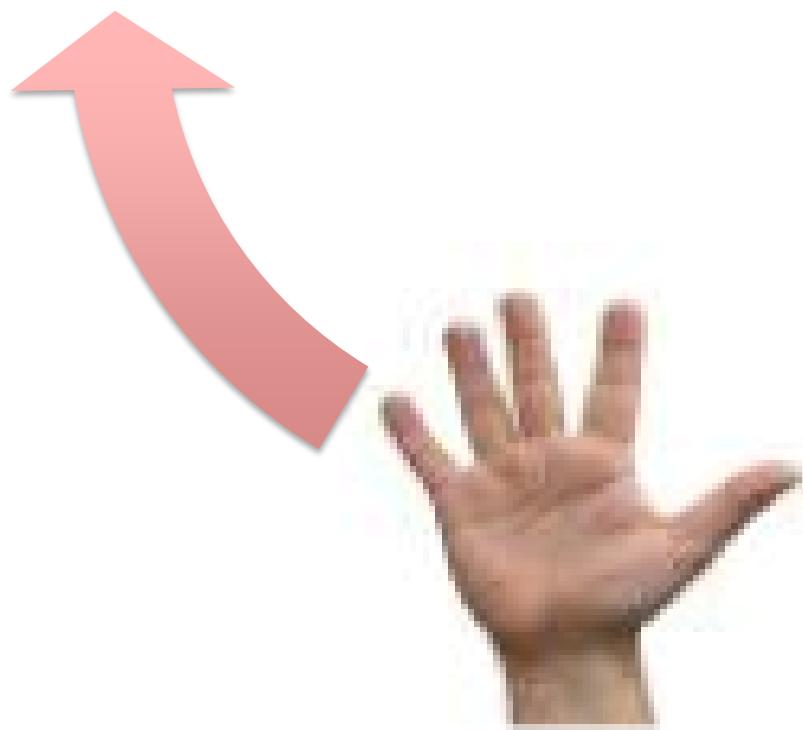

*A competence is the ability to apply a synthesis of*

- *Knowledge,*
- *Skills and*
- *Attitudes*

*in a particular situation\* and in a particular quality\*\*.*

\* Context

\*\* LEVEL

But how do we assess a competence?

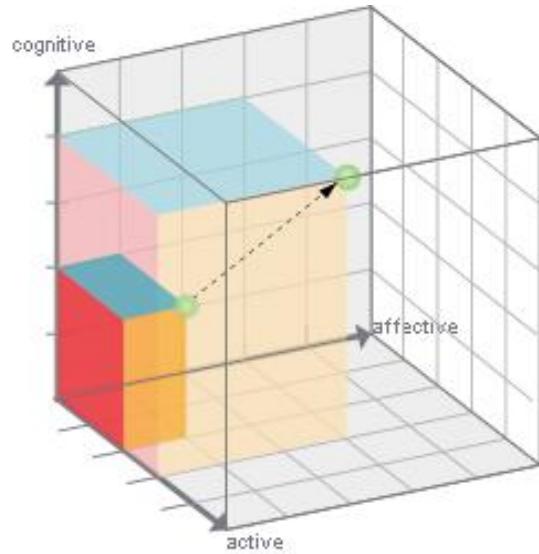

LEVEL

As an additional approach to validate competences

- **Developed in a transnational** community of European experts and practitioners working in **25 organisations from 22 European member states** since 2005 (10 LLP projects)
- **Piloted and applied in more than 100 learning projects** and 1000 learners, scientifically evaluated in two PhD theses.
- To serve especially target groups that learn **outside or beside formal education contexts** and their learning facilitators:  
mobility projects, youth organisations, learning projects in schools, learning at the workplace, etc....
- Owned by REVEAL, a European Network Members from 22 countries, founded in 2005 and managed by blinc eG.

## An approach and instrument to document and visualise (evidence) competence developments

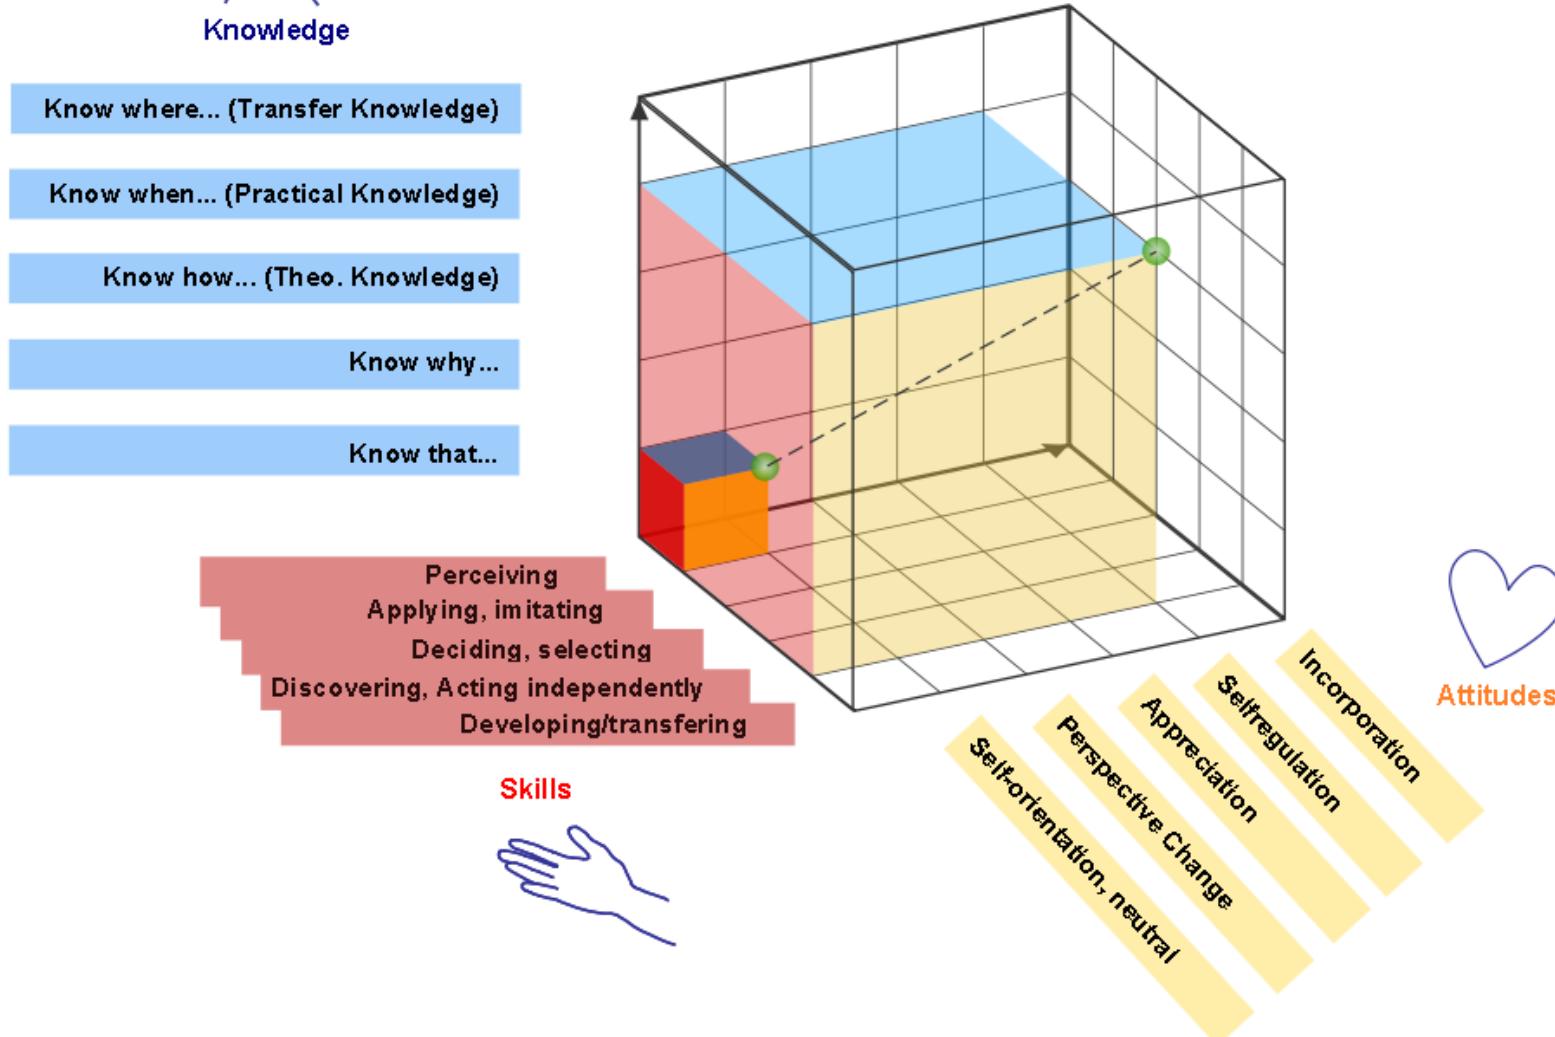

**Especially:**

- *Personal,*
- *Social and*
- *Organisational*

**competences**

LEVEL5

The LEVEL5 Cube as core element visualising the development of Knowledge, Skills and Attitudes in a learning project (activity)

# LEVEL5 Reference system

LEVEL	KNOWLEDGE	SKILLS	ATTITUDES	
5	Know where else... (knowledge for Transfer)	Developing/ Constructing Transfering	Incorporation (Internalising)	
4	Know when... Practical knowledge	Discovering/ acting independently	Affective self-regulation	
3	Know how... Theoretic knowledge	Deciding/ selecting	Appreciation	
2	Know why... (Distant understanding)	Applying Imitating	Perspective taking	
1	Know-that...	Perceiving Listening	Self orientation Neutral	Context

## The general reference system

- Is the basis to create a reference system for each competence (e.g. networking, teamwork)
- In the next step descriptors and indicators support the contextualisation and
- The adaptation to the learning situation

# LEVEL5 Reference System on Networking

	COGNITIVE/KNOWLEDGE		ACTIVITY		AFFECTIVE

The general reference system with descriptors (column 3) for each dimension and level.

# Griglia divisa per dimensione

1 livello	2 Titolo Livelli	3 Descrizione del livello Spiegazione	4 Indicatori/ Contesto	5 Peri odo 1	6 Peri odo 2	7* Documentazione (Risultati da descrivere nel periodo 1 e 2)
5 ↑	Trasferime nto intuitivo	Capire intuitivamente (o essere in grado di acquisire conoscenza) come gestire un cliente con disabilità o disagio mentale in una situazione specifica.	Essere in grado di citare la giusta azione quando confrontati con una situazione sconosciuta			
	Sapere quando (Comprensi one implicita)	Capire quali azioni sono necessarie per aiutare i clienti con disabilità o disagio mentale e risolvere un numero di situazioni.	Ex. Essere in grado di nominare la giusta azione quando confrontati con una situazione conosciuta.		X	Examples
	Sapere come	Conoscere teoricamente i bisogni specifici dei clienti con disabilità o disagio mentale e sapere in generale come adattare il proprio comportamento e approccio ai bisogni di tali clienti.	Ex. Ricordare alcuni disordini, le ragioni e i bisogni specifici di tali persone.			
	Sapere perche' (Comprensi one distanza)	Sapere che ci sono diversi modi di gestire la clientela e che i clienti con disabilità o disagio mentale hanno bisogni diversi.	Riconoscere che i clienti possono avere bisogni specifici a seconda della loro disabilità o disagio mentale, senza sapere come adattare il proprio comportamento.			
	Sapere che	Sapere che alcuni clienti (disabilità o disagio mentale) si comportano diversamente e che l'accoglienza del cliente è importante in un supermercato.	Sapere, molto genericamente, che i clienti possono avere bisogni specifici, senza saperli citare.	X		Examples

At the beginning of the learning experience...., at the end ....

**Learner-Certificate:  
BOIT**

reveveal

## Participant

Elisabeth Frankus, , born 03.30.1981, .

## Informal learning project

BOIT

Beginning: 01. 01. 2010

Ending: 12. 31. 2011

Institution:

Place: Learning happened f2f during project meetings and via virtual synchronous and asynchronous communication

## Description of the informal learning activity

BOIT is a Leonardo da Vinci project run by an international consortium of 7 partners. The project team developed a training course for burn out intervention and prevention.

The final beneficiaries of the project are people with burnout risk and those who are already affected by burnout. The Burnout Intervention Training for Managers and Team Leaders aims at preventing working situations with burnout risk.

The evaluation started in 2010 and was finished in 2011.

## Topics of the evaluation

BOIT PM

This refers only to the coordinating partner crew

## Methods of the evaluation

Assessment and evaluation happened in a mix of external and internal approaches:

External: Observations

Internal: Self assessment with the grid and eventually the blend with an exchange about both ratings in a discussion

## Evaluator

External: by a REVEAL group member; Internal: Self assessment by learners/partners; ratings were discussed

**LEVEL5 certificate  
to document the  
acquisition...**

**Evaluation summary**

Elisabeth was firstly confronted with a diverse team and learnt to respect different backgrounds, strengths and weaknesses of the team members. She was able to collaborate and distribute tasks in regard to diversity aspects.

**Learning outcome: BOIT PM****Competence profile at the beginning:**

cognitive: She knew requirements of EU projects and the necessary tools that have to be used.

active: She applied the necessary tools from the beginning as she was instructed.

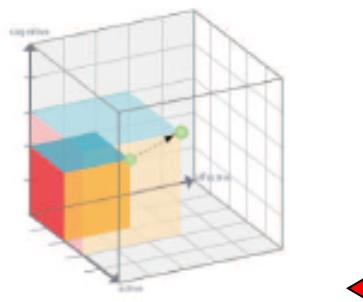

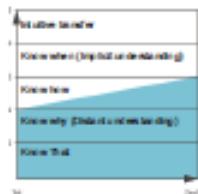

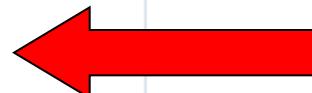

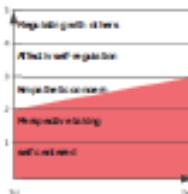

affective: She accepted PM as necessary. She applied the necessary tools from the beginning as she was instructed.

**Competence profile at the end:**

cognitive: She knew how to use all relevant LLP tools adequately.

active: She successfully accomplished the PM tasks in the LLP framework.

affective: She successfully accomplished the PM tasks in the LLP framework.

**Learning outcome on the learning dimensions****cognitive****active****affective**

She came into the project with a theoretical PM background and applied her knowledge successfully in the BOIT context.

She was guided into the PM tasks and successfully managed the internal processes (monitoring, controlling, communication).

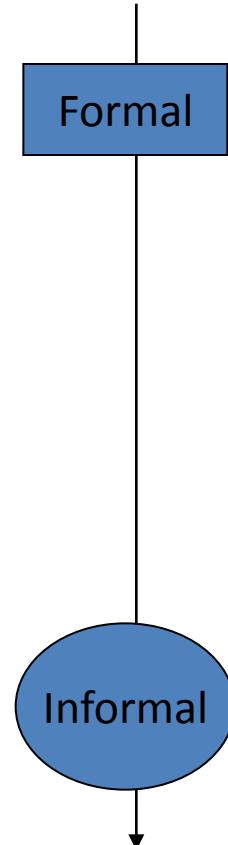

She was guided into the PM tasks and successfully managed the internal processes (monitoring, controlling, communication).

...and the development of the competence
